

# CRAFT BOX

## SCIENCE - PUFFY PAINT

This activity is for Beavers but any section or leaders could take part too !

### Beaver Science Challenge

#### What you need:

- 125g Plain Flour
- 240ml Water
- 240g Shaving Foam
- Food Colouring
- Large Freezer Bags (zip-lock ones best)
- Scissors
- Paper

#### How to make it:

1. Open the freezer bag and add the flour and water.
2. Close the bag and mix well so that there are no lumps or clumps.
3. Open the bag and add a few drops of food colouring and the shaving foam.
4. Close the bag and squeeze the bag gently to mix all the ingredients together.
5. Cut the corner off the freezer bag and use the bag to "pipe" your puffy picture – the bigger the corner cut off the thicker the piping will be.
6. Pipe onto a large sheet of paper.

#### Get more Crafty:

Why not make several bags of different coloured puffy paint and create some large-scale patterns on your driveway or in your garden and when completed, photograph it and wash away with more water.

#### Safety Notes:

**Scissors / Sharp Objects:** Supervise young people appropriately when they're using scissors. Store all sharp objects securely, out of the reach of young people.

**Food / Allergies:** Check for allergies before you begin. Make sure you have suitable areas for storing and preparing food and avoid cross contamination of different foods. All activities must be safely managed.
